

Figure 1. Schematic representation of the experimental design. The first part of the experiment consisted of a 10-min familiarization period. The second part consisted of 12 trials, each lasting 10 min. The trials were divided into three groups of four trials each, corresponding to the three different conditions (Control, 100% and 50% load). The trials were performed in a random order. The third part of the experiment consisted of a 10-min recovery period.
